How to apply

The application for studies starting in August 2026 is open from 16 October to 15 January. Some programmes are jointly given in collaboration with other universities with different application deadlines.

1 Choose your programmes

Explore our 63 master's programmes and find one or more programmes that fit your interests.

2 Check the requirements

You can find the requirements for each programme at www.kth.se/master. If you have the background to meet the requirements—start your application!

3 Submit your application

You apply at universityadmissions.se, the Swedish national application system. You can select up to four programmes.

4 Submit your documents

Submit all required application documents, for example, certificates, transcripts and a copy of your passport.

5 Pay the application fee

If you are not an EU, EEA or Swiss citizen, you need to pay an application fee of sek 900.

6 Check the admission results

On 26 March you can find the results at universityadmissions.se. If admitted, we will provide further information about how to prepare for your studies.

Admission requirements

- Academic qualifications from an internationally recognised university equivalent to a Swedish bachelor's degree.
- English language proficiency equivalent to an overall IELTS score of 6.5 or a TOEFL score of 90.
- Programme specific requirements are listed on www.kth.se/master.

Fees and scholarships

If you are not a citizen of EU, EEA or Switzerland, you usually have to pay fees to study in Sweden. The tuition fee for most two year programmes is SEK 360,000 (around €32,200). There are a range of KTH and external scholarships available, all listed on www.kth.se/master.

Master's programmes

Architecture and the Built Environment

- Architectural Lighting Design (One year)
- Architecture
- Civil and Architectural Engineering
- Environmental Engineering and Sustainable Infrastructure
- Real Estate and Construction Management
- Sustainable Technology
- Sustainable Urban Planning and Design
- Transport and Geoinformation Technology
- Transport, Mobility and Innovation (Joint)

Electrical Engineering and Computer Science

- Communication Systems
- Computer Science
- Cybersecurity
- Cybersecurity and Assurance (Joint)
- Electric Power Engineering
- Electromagnetics, Fusion and Space Engineering
- Embedded Systems
- Energy for Smart Cities (Joint)
- ICT Innovation
- ICT Innovation (Joint)
- Information and Network Engineering
- Interactive Media Technology
- Machine Learning
- Nanotechnology
- Nuclear Energy (Joint)
- Renewable Energy (Joint)

- Smart Electrical Networks and Systems (Joint)
- Software Engineering of Distributed Systems
- Sustainable Digitalisation
- Systems, Control and Robotics

Engineering Sciences

- Aerospace Engineering
- Applied and Computational Mathematics
- Biostatistics and Data Science (Joint)
- Computer Simulations for Science and Engineering (Joint)
- Engineering Mechanics
- Engineering Physics
- Mathematics (Joint)
- Naval Architecture
- Nuclear Energy Engineering
- Railway Engineering
- Vehicle Engineering

Engineering Sciences in Chemistry, Biotechnology and Health

- Chemical Engineering for Energy and Environment
- Data-driven Health
- Industrial and Environmental Biotechnology
- Innovative Technology for Healthy Living (Joint)
- Macromolecular Materials
- Medical Biotechnology
- Medical Engineering
- Molecular Biotechnology and Bioinformatics
- Molecular Science and Engineering
- Molecular Techniques in Life Science (Joint)
- Sports Technology
- Technology, Work and Health

Industrial Engineering and Management

- Decentralized Smart Energy Systems (Joint)
- Engineering Materials Science
- Environmental Pathways for Sustainable Energy Systems (Joint)
- Industrial Management
- Integrated Product Design
- Machine Design
- Mechatronics
- Production Engineering and Management
- Sustainable Energy Engineering
- Sustainable Production Development
- Technology-based Entrepreneurship
